**Link to Fetch AMP URLs:**

https://amp.dev/documentation/examples/guides/using_the_amp_url_api/

Steps:

Get "urls.txt" from Whatsapp -> it contains 150 text files each containing 50 URLs -> open the text files individually -> copy/paste text in the above link to fetch AMP URLs and press "Execute" -> It'll return AMP URLs -> Add URLs in the table below -> We need to gather at least 50 AMP URLs

NOTE: If the original URL and AMP URL is the same, ignore it.

AMP URLs Table

#	AMP URL	Original URL	CDN AMP URL
1	"https://www.suara.com",	"https://amp.suara.com/",	"https://amp-suara-com.cdn.ampproject.org/c/s/amp.suara.com/"
